Summary

Aspiring software developer with real world experience in back-end development and API integration. At Anekant Technology, I worked on integrating cruise APIs like Cordelia and Arosa helping standardize and deliver data through our internal NET-based API. Previously, I developed with C#, .NET, and debugging, and always looking to build smart, reliable solutions.

Experience

Software Developer Intern

Apr/2025 – Current

Company: Anekant Technology, Delhi

- Built and deployed NET services integrating multiple cruise APIs (Cordelia, Arosa, MSC) to extract and normalize data for a unified internal API.
- Worked on fare check, availability, and mapping XML/JSON responses to application-level models using .NET technologies.

Software Development Intern

Dec/2023 – Jun/2025

Organization: Krishna Vikash Group of Institutions, Bargarh

- Designed and implemented an admissions management system to streamline the student admission process.
- Created an institutional content management system to manage different types of content using .NET MVC.

Projects

Cruise Data Integration API

Internship Project at Anekant Technology

- Built a unified internal API in .NET to fetch, normalize, and expose data from cruise providers like Cordelia, Arosa.
- Handled fare check, availability, cabin layout by mapping combined XML/JSON responses to application-level models.

Admission and Content Management System

Internship Project Krishna Vikash Group of Institutions

- Built a full-featured, .NET-MVC web platform for handling student admissions, inquiries, and OTP-based login.
- Developed content management system—with full CRUD and file upload functionality, along with automated email notifications.

Skills

Programming Languages: C#, HTML/CSS, JavaScript, Java

Frameworks & Libraries: .NET, MVC, Bootstrap, jQuery

Database: SQL

Tools & Platforms: Microsoft Visual Studio, VS Code, SSMS, GitHub
